SUMMARY

I am a data and systems professional experienced in creating reliable ETL processes, and data solutions. I'm excellent at creating SQL queries, reports, stored procedures and views, with additional expertise in Python data libraries. I've worked extensively in SQL Server and MySQL. I'm passionate about data and I am an enthusiastic lifelong learner.

SKILLS

Data and Development

Advanced SQL queries, views, stored procedures, functions, triggers, SQL Server, MySQL, ETLs, Python, Pandas, SQLAlchemy, some Power BI and Tableau, JSON, XML, OOP, APIs, PHP, HTML, CSS, Java Script, Git, Postman, SSMS, AWS exposure (S3, Glue, Athena), Laravel, some SSIS, data modeling

Network and System Administration

Docker, Active Directory, Windows, Linux, iOS, macOS, VMware, Hyper-V, SaaS, data center management, SFTP, SSH, network administration, Aruba wireless, Wi-Fi

WORK EXPERIENCE

Data Connect Corp, Centennial, CO

Data Developer and System Engineer

December 2002 to October 2025

- Developed and optimized complex SQL queries and ETL pipelines to collect data from APIs, databases, JSON, and XML into SQL RDBMS improving client processes, saving time and increasing accuracy
- Cleaned and transformed data using Python scripts and SQL stored procedures
- Streamlined client data processes using Python to ingest data from APIs, transformed data with python and SQL reducing manual work and delivery time
- Built and maintained JasperReports to meaningfully display client data and reveal business insights
- Gave management progress analysis tools through PHP based reporting tools for process and work queue monitoring
- Maintained and updated data driven PHP and Java based web application
- Established and monitored data replication between remote and data center locations
- Orchestrated complex scheduled processes to move data through various stages
- Analyzed complex data and developed migration and conversion plans for large Fortune 500 enterprises
- Migrated physical servers to virtual environments using both Hyper-V and VMWare platforms
- Developed SQL queries to improve efficiency in implementing data systems by targeting relevant components drastically cutting implementation time
- Reliably maintained critical business infrastructure, networks, systems, databases and websites in a 24/7 data center environment
- Built PHP/SQL Server based vendor management application to add customer records, associate vendors and automate emailing vendor rebates

TREEV, Westminster, CO

Data Conversion Specialist May 2001 to October 2001 | **Implementation Lead / Implementation Engineer** January 2000 to May 2001 | **Implementation Engineer** February 1998 to January 2000 | **Support Technician** October 1997 to February 1998

- Performed data conversions for TREEV content management systems
 - Converted legacy TREEV system data to import into latest TREEV systems
 - Analyzed data, developed a conversion strategy and scripts to convert data
 - Worked with customers to develop data mapping for their new systems
 - Supported team of Implementation Engineers performed implementation of document imaging systems
 - Completed professional implementation of TREEV document imaging systems
 - Visit banking industry customers onsite to perform hardware/software/SQL setup, customization, and training to customer specifications
 - Upheld functionality of critical data systems for banks and other institutions
-

Education

University of Colorado, Boulder

Degree: Bachelor of Arts

Activities

America Diabetes Association Tour De Cure

- Campaigned to raise funds
- Bicycled single day 100-mile fund raising events for diabetes research

Photography and Videography for Wellness Group

- Photograph events and edit photos to be used in websites and marketing material
- Video interviews and lectures and edit for social media
